

All rights reserved. Page 2 Go This document is intended to introduce new See Electrical users to the basics of building electrical components and to help them better understand how they and interact with each other electrical and electronic components. The first part of the document (introductory part) explains how an electrical product is made, why it is needed and how it should be designed. The following four parts provide examples of some of the steps involved in creating an electrical component. In addition, here is a list of abbreviations used in the document and a breakdown of the document.
