
Best Dynamic Cam Settings Wow

December 1, 2018 - One of my problems with the dynamic camera is that the camera moves suddenly and quickly when switching targets. What settings are you using? And how do you deal with this problem? - If you are using a dual-sensor camera and using touch controls, you must use one of the following settings: Frame-in-Picture or Frame-by-Frame mode. If you are using a single sensor camera and using touch controls, you should use Frame by Frame or Frame by Frame and then go to Continuous Adjust or Continuous Switch. You can select Frame by Frame or Frame by Frame manually.
