Q: Optimizing multiple "where" clauses I have a query which runs extremely slow. Some of my "where" conditions look something like this: WHERE mp.MaterialId = 2 AND mp.ProductId = 27 This example will be expensive because it has 4 parts: mp.MaterialId = 2 mp.ProductId = 27 Theres obviously a way to run something like: WHERE 2 AND 27 so I tried this: WHERE mp.MaterialId = (SELECT mp.MaterialId FROM MaterialProduct mp WHERE mp.ProductId = 27 AND mp.MaterialId = 2) But then it complained that I didn't have any fields in the second table in the inner query. While I have been interested in what type of drawing media is best suited for our fast-paced digital times, my recent interest in working on my iPad Mini, combined with my love for sketching all but precludes me from sketching exclusively on paper. I have already blogged about my own sketchbook, but in this article I wanted to show how I have now integrated the iPad's tablet mode into my sketchbook. Why, you ask? [Source] How To: Convert Photos to Sketchbook Drawings in Photoshop If you're looking to turn a bunch of photos into a giant sketchbook, all you have to do is use Photoshop and a couple of images. Visit your photos at Adobe Stock, where you'll find dozens of stock-quality images. You can also search in the stock-quality archive, either by subject (for example, landscapes, flowers, and animals) or by image number. Using Photoshop, import the photo(s) into your project, and select the photos. Then, use the Advanced Extract command (or the Channel Mixer / Color Range command, depending on which option you select) to split the image into three separate images. [caption id="" align="alignnone" width="297" caption="To find Advanced Extract, simply type either of these into your search box: Pixel Density, Texture, Color Range," class="caption-width-300"] [/caption] Select Image > Canvas Size, and drag the canvas size to the point you want your new image to be. In this case, I selected 3000. Then, type a size and click OK. Next, make sure that your image is selected in the workspace window (ctrl+A) and go to Image > Canvas Size again. Drag the canvas size until you reach the size you want. In this case, I chose 2000. Import the three separate images back into Photoshop.
