Windows Virus Safety
is a new app that aims
to protect your
computer from
malicious malware.
From all of the anti-
malware software
available, this is one of
the most unique ones
as it doesn't just scan

your system for viruses, but actually restores and improves it. The concept of this software is quite ingenious as it's based on creating a virtual environment of Windows that doesn't contain any harmful files or applications.

You can download and install it directly from PortableApps.com without any additional software, or on a portable device through the free PortableApps.com website. The utility is made in such a way that the virtual system

is made with Windows 10 Home and it's called Windows 10 Pro. It runs on all Windows 10 devices, including laptops, tablets, phones, and more. There's no option to manually set the desired level of security, as the

software will automatically start up at a basic level, and make your device run the fastest. However, you can access other settings to fine-tune it. All the benefits of a complete virus scanner Windows Virus Safety is a complete anti-

malware software that not only scans for malicious files, but also protects your system by making changes to your Windows registry. The program can also fix and repair corrupt registry entries, and removes the leftover

registry entries after a clean install. You can configure the program to block/scan specific types of applications, like third-party software, browser plugins and applications that are not downloaded from the official Windows

Store. You can also set to turn on/off the automatic system scanning and protection by scanning only upon a reboot, or at certain times, like after every two hours. It is also possible to scan your system on demand to make sure

your computer is virus-free. The program can be configured to automatically scan system resources like drive C, D and E at periodic intervals.

Additionally, you can set to scan the malicious files, even if they are already

deleted or replaced.

Designed as the portable counterpart of Smart Windows App Blocker, this is an approachable application that enables you to block any installed programs from running, in order

to restrict the access
of other users.

Although it may seem
advanced, the tool
actually contains
simple-to-understand
options and no
comprehensive
configuration
parameters, so it can
be handled even by

inexperienced
administrators.

Portability benefits

You can save the
executable file to any
part of the hard disk
and just click it to
launch the program, or
even move it to an
external storage unit to
directly run it on any

machine with
minimum effort and
no previous installers.
Unlike most installers,
Smart Windows App
Blocker doesn't
modify Windows
registry settings.
Intuitive UI and
options Wrapped in a
user-friendly interface

made from a regular window with a plain and simple structure, the utility invites you to indicate apps to block using the file browser or drag-and-drop support. It's possible to prevent as many programs as you want from launching.

However, there is no batch mode available, so you can block only one item at a time.

Seamlessly block and unblock programs The main window shows the name, product name and file path for each app. Unblocking a program is just as

easily done, with the click of a button.

Furthermore, you can test a blocked app without leaving the interface, as well as copy its file path to the Clipboard. There are no other notable options provided by this software tool. The

programs will remain
