An epic adventure full of excitement! Your character has the power to create a tragic story full of sadness, or an inspiring story full of hope. The story of the game is displayed in the flowing story, and the actual story changes depending on the choices that you make. If you don't like to directly choose your story, you can also select some of the characters who will accompany your journey and develop them as your allies. However, as you cultivate your relationship with them, you will also be linked to the rest of the characters who have the same goal. Story Showing You and up to three of your AI characters can experience a story consisting of a wide range of scenes. As you progress, you will face various obstacles and dangers that will test your resolve. * The scenes in the game are designed to be fluid and run in one direction, but you can directly switch between scenes at any point using the "Quick switch" button. * The "+" button opens the scene window with more information, including the name of the character who is speaking. * The "←" and "→" buttons allow you to travel to other scenes and return to your current scene. * While in the scene window, you can use the "Auto" button to move forward automatically. * As you progress through the story, there are two ways to save your game: by using the save button in the scene window, or by saving the game manually in the menu. * If you are in the middle of a chapter, you can resume your game from where you left off by opening the menu. If you reach the end of the chapter, you will be able to return to the beginning of the chapter by opening the menu. Endless Story: An Endless Story — the Legend of the Elden Ring Whether you like to take a simple path or take a path full of hardship, you can travel the Lands Between freely. With countless opportunities to gain strength and acquire items, you can experience a story of adventure that you can revisit at any time. The Legend of the Elden Ring will be played continuously even when there are no other players present, and you will be guided to the very end by a mysterious hint-giving fairy. You will not be able to exit this world, and you will discover the explanation for the existence of the Lands Between. * Once you save your game in the scene

It uses the item class to store the parameter data then converts it to the object for serialization. The Unity object works fine, but the web API breaks with the following exception System.Net.WebException: The remote server returned an error: (500) Internal Server Error. [Update] I've confirmed the problem is with this method, and I made sure this method was working in a separate project (A build pipeline integration unity project). [Update2] I've managed to narrow it down
