Elden Ring

Firaga of Koshiki by 🟦🟦🟦🟦🟦 14.7 I'm now a bit more 'modern' than before and in this game I can battle without having to hide behind a stone wall or an assassin in traditional text-based RPGs. The main thing I miss in it is the Backstory of the Land of Elden/Vermillion, but the combat is so exciting that I'm willing to sit through the backstory of another character if the combat is that fun. Here's a short video of how it plays. 9.9/10 This game is awesome, and I'd recommend it to anyone who enjoys video games. No bug or major glitch issues to report, and the combat is extremely fun. Enjoy! Firaga of Koshiki by 🟦🟦🟦🟦🟦 14.7 My rating is on the low side compared to some of the other reviews but I'll try to explain. I tried to play this game almost straight through but about halfway through I

had to close it. This game was a fun and engaging experience, but it took me about a week to get through a single story and I got really into it! I don't want to spoil anything, but it was like a long, long story-telling game and the ending was wonderful. But that part took me about a week to get through, after which I tried to play it again (and failed again!) The combat was very interesting. You're free to use specific commands with what are called 'mechanics'. For example, you can use the A button to move, X to attack, Y to jump, and L to change items. The combat is very good, since it's incredibly fast. Also, using certain items can give you an advantage. For example, on my second playthrough of the game, I went with an A1 to attack, but I also added a Y2 and L2 mechanic to it. This way I could attack up close if necessary, but also have advantage at any distance. This game is a fantastic experience for the RPG genre. And of course, video of the combat in action: bff6bb2d33

In Patch 2.60, world quests that include a Dungeon object have been added. You can now select particular Dungeons and get Dungeons-exclusive drops in your Dungeon [Dungeon Entry]. For example, if you have obtained the Caster's Dream, you can select the Cindarcastle Dungeon object or Spider's Dream

Dungeon object, and either of which will reward you with good items and experience points. These objects can be cleared once per day per character. Don't get too attached to the Dungeon object or items dropped there however. Items that have "marketable" values are only available in the Dungeon, not in the shop or on the Auction House.
