FIFA is an ongoing series of association football video games. In FIFA 21, players step on the field and control either the five-a-side or 11-a-side game modes, working their way through pre-defined seasons and tournaments to become the world's best soccer player. Each game is set on a different worldwide football surface and has a unique soundtrack and atmosphere. In each game, the player's objective is to score more goals than their opponents. Here are some of the key features from this year's release:

NEW PLAYERS: New Career Mode Gameplay mechanics and presentation updates to add career progressions, stamina and conditioning, new importations, and coaching to bring the game closer to the reality of playing and managing a professional soccer club. A true, player-centered Career Mode, there are now more challenges, rewards, and customization options to play the way you want!

More customization: Roster updates: players have more individual stats and more variants in their overall style (hair, eye-wear, etc). Players also have more facial animation and hairstyles, both in-game and in-player.

More Player Intelligence: Improved instant gameplay, improved player control, and new dribbling animations and reactions. Players will approach close encounters differently, and alter their play in reaction to the environment around them.

Advanced tactics: Changes throughout the game have given tactical options to the players in the way they perform their duties. Players can now make key movement decisions at the right moments for the team, avoiding unnecessary touches and blocking off and anticipating opponents. It's up to the player to decide what to do with the ball on the pitch.

More FIFA Ultimate Team: FIFA Ultimate Team delivers the biggest update ever to create more realistic player and club trading. It features a new draft mode, new card purchases, and new pack items for new and existing players, cards, and packs.

Two kits per player: FUT gives fans the chance to see more of the authentic look of each team as they represent their nation. Players can now switch between three kits each game, bringing FUT to a whole new level.

Motions and Player Intelligence: Players now control their animations from the very start of the match. They start with a target in motion, and a clear intention to either pass or shoot. They will either execute the animation outright, or change their mind mid-animation
