Q: How to find whether a method is void or not in c#? Possible Duplicate: How do I determine if a method is void in C#? We know that in java if we want to find whether a method is void or not we can find it by using @Override and in c# also we can do that by using the keyword override is there any way to do it in c#? A: The void keyword on method defines them as returning nothing or having no return value. If you want to check whether a method is void or not, just call it, for example: if (SomeMethod()) { // Method was void. } A: If you want to find out if the method has no return value you can simply check the return type. If the method has a void return type, the return type will be void. If the method has any other return type, the return type will be the return type of that method. A: if (MethodInfo.ReturnType == typeof(void)) { //Method is void } It works in c# as well. Of course, you may want to handle void return types by special handling. But that's not what you want here. By Online Desk The US has expressed its desire to upgrade its existing military ties with India and has come up with a list of defence equipment to be procured, a person familiar with the development said. The list, which was recently sent by US Secretary of Defence James Mattis to his Indian counterpart Nirmala Sitharaman, has been decided by US President Donald Trump during his recent foreign tour, this person said. In the letter, he had noted that if India accepted this list, it would further enhance the strategic relationship between both the countries, the person said. "While the list has been decided by the President during his recent foreign trip, Indian officials have been briefed about the details," another official said. Mattis, who arrived here yesterday on a two-day visit to India, has had several meetings with his Indian counterpart Nirmala Sitharaman. During their meeting in Washington, they discussed how to boost military cooperation between both the nations, the official said. On last week's Trump's summit with Chinese President Xi Jinping, Sitharaman
