Import from or export to the PDF file format. More ways to customize a drawing: Customize drawings based on selected drawing objects. Select the objects and adjust settings without moving the mouse or drawing objects. Paste and Edit Drawing Views: Edit and paste drawing views. "Paste and Edit" functionality allows you to merge copies of the original drawing, or pastes of drawings that are adjacent to the original, into one drawing. This can be useful for posting content from one drawing to other drawings in a drawing set. Paste and Edit will automatically merge multiple views of the same object into a single drawing or group. You can now paste an entire drawing set, or even paste and edit the entire drawing, from a shared directory. Texts in Drawing Views: Create and organize texts in views. Create texts and assign them to objects and to viewports. Viewport texts appear automatically for you, and you can edit them. Use them for information, titles, and labels for the objects in a viewport. You can create multiple sets of texts and assign them to views. Dashed and Filled Lines: Create dashes and fills with text settings. Control the appearance of dashes and fills. Control the thickness and spacing of the lines. Use with special symbols. Fillet Edges and Collapse: Add fillets or collars around rounded or pointed shapes. Add a fillet or collar to a rounded or pointed shape. Control the amount of overhang.
