drives. * Supports the configuring of new destination shares. * Has a choice of available interface languages * Support for image files for the display of icons * Displays a list of networked devices and shares * Supports VBScript for scripting * Share Manager can view SMBv2, SMBv1, and NTLM shares * Proactively and intelligently monitors network traffic to detect changes in Share and Map data * Does not require server side updates and can work offline Requirements: Share Manager Mac Features: * Capacity indicator allows you to add/remove shares and edit the size of share containers * Map Network Drives allows you to make new

network drives * Recursively scan the drive for shares * You may configure your desired share name to open with the application. * Edit and delete existing shares. * Allows you to navigate to the different directories on the drive. * Show some additional information for each share and map * Create new shared folders, drives, and maps * Displays a list of folders, users, and computer names * Shows user information about mapped drives * Displays a list of shares and allows you to open, delete, and manage shares. * Has a rich selection of icons to represent each folder type

What's New In?

Share Manager is a straight forward application that can display and create shares and mapped network drives. It gives you basic information about each entry and allows you to open or delete existing shares and maps or create new ones. It also has advanced options such as DFS replication and Queue support. Getting Started: The Share Manager can be started from the Start menu using the Run dialog or by typing `%windir%\system32\lsass.exe /s` Or on an Administrator Command Prompt Type: `C:\Documents and Settings\All`

Users\Start Menu\Programs\lsass.exe /s
Or on a user Command Prompt Type:
C:\Documents and Settings\All
Users\Start Menu\Programs\lsass.exe /s
Or on a Command Prompt window
Type: C:\Documents and Settings\All
Users\Start Menu\Programs\lsass.exe /s
Network & Site Switching Option: If you
wish to use the Share Manager in a
networked environment, you need to
enter the following information: In the
File Name box, type
%computename%ShareManager.exe
Type the password for the network that
will be used You can set the location of
the \\sharemgr32 file by clicking on the
Browse box and navigating to

c:\sharemgr\sharemgr32.ini and then enter the path information into the File Location box and pressing Enter Adding Shares to the Share Map: When the Share Manager is started, you will be asked for a User Name and Password for the share that you want to create. You can enter these names on the main screen or in the Network Manager Window Enter a share name that will be used to identify the share on the network. You can add multiple shares The Sharer security option to add the account when the share is created can be changed in the Security option, in the Add Accounts page You can remove the account from the account list Users

can add or remove accounts from the Add Accounts page

Editing a Share Entry: To change the information that is displayed for a share, click on the entry and select the information that you wish to modify from the Modify List box and then press Enter to return to the main Share Map Screen

When you want to delete a share, click on the share entry Press Delete

Selecting Shares on the Share Map: When the Share Map is selected, the share information is displayed in

System Requirements:

Minimum: OS: Windows 7 64-bit /
Windows 8 64-bit / Windows 10 64-bit
Processor: AMD CPU with SSE2
instruction set support. Memory: 8 GB
of RAM Graphics: Nvidia GeForce GTX
660 or AMD Radeon HD 7870 DirectX:
Version 9.0 Hard Drive: 15 GB available
space for installation Recommended:
Processor: AMD CPU with SSE4
