>> DESIGN The basic layout for the game is the main story, which begins with a player going to a place where different events occur. The second is the field that offers a variety of exciting events. While exploring the field, various events are triggered, and the story of that event is completed. In addition, the field is divided into three, which can be crossed at any time. Starting point is the first field, and you can explore its world via the story and various interactions. You can gather information about the world's information and characters, and can strengthen your character or develop various skills to become a stronger adventurer. For that, you'll need to explore the first field, and increase your experience. It is because all of the characters that appear in the different fields have individual traits. In addition, there are abundant content from the world. Because these content are obtained by entering and acquiring rewards from events in the field, experience can be obtained easily. Various resources such as skills, items, and stats are all obtained by entering and acquiring rewards, which has led to a variety of skills that respond to certain field events.
