Full Version**

A: WinZip is not a necessity for cracking. (It's just a compression tool.) Besides, it's the compression algorithm that does the job. I think rar must use a strong compression algorithm for the file you uploaded, and that's what only leads you to the answer in your question. (It's not that the file is small or large, it's just the compression ratio of the algorithm.) There're probably a lot of situations, but I wonder if you got zip from a cracked software or from some leaked software (which is more risky) by using the download link, or copied directly the software zip file from a website. (If it is the case, the file you got may have been compressed by a compression tool other than WinZip.) [The rational use of antibiotics in neonatal care. Making it happen]. Progress in neonatal care has led

---

to a considerable reduction in neonatal mortality. However, in the last decade, a rising incidence of resistant neonatal pathogens has been reported. A direct consequence is that neonatal sepsis remains one of the leading causes of morbidity and mortality. There is a need for the development of routine guidelines for the appropriate use of antibiotics in neonatal care and that which will help to control resistance is the rational use of antibiotics. The Spanish Neonatal Society has decided to launch a campaign on the rational use of antibiotics in the Neonatal Intensive Care Unit, based on the elaboration of a consensus. The principal objectives of this campaign are: 1) to contribute to the preservation of the effectiveness of antibiotics; 2) to improve the quality of care; 3) to prevent the emergence of resistance to antibiotics; 4) to reduce the burden of hospital infections and 5) to promote the role of the public health services in the promotion and
