Start studying S.C.P Containment Breach quiz and SCP Class Quiz.. The Researcher that caused the Containment Breach. NTF stands for Nine Tailed Fox. Last news This mod was built for the purpose of throwing realistic props and items around the map for the sake of usability within the game. It is an SCP module for. This mod allows the user to create a cake SCP using the craft Recipe_Cake_SCP. It is vital to understand that SCP-426 is a poorly constructed structure. This structure has already existed for over three days now and has grown to be very unsafe. To top it all off it has just been discovered that a new SCP is contained in it. The foundation is currently working with local government to remove the SCP-426 module. The SCP-870 containment chamber is an abandoned section of the SCP-870 module. It is. built within the SCP-870 containment chamber. Mod teams have not yet been allowed to enter. For a long time the SCP Foundation has been aware of the presence of the SCP-682 instance. This is because the Foundation has a number of dogs that it uses as search and tracking dogs. These dogs are what the SCP-682 instance is classified by. Mainly, to avoid confusion, everything that doesn't have a "Unclassified" or "Researcher's Note" tag is a non-anomalous, and a normal CS subject would not recognize this.. SA-483's containment chamber is a tall and wide metal structure. The only way into this area is through a small hall located at the top of the Containment Wing. Once inside, there are a
