I know about Unity desktop layouts which allow to create and update layouts with dynamically generated panels. A: You're asking about QML (or the related QDeclarative) on a desktop platform. The short answer is no, there are no (good) alternatives to the designer tools available for the desktop at the moment. However, I've actually started developing a cross-platform way of building UI components for X11 (desktop, mobile, web, embedded systems) using QML/QDeclarative. It's still very much work in progress, but I'll keep you posted on the progress. (Disclaimer: I'm the lead developer.) Valproate inhibition of rodent hepatic microsomal O-dealkyl
