Este es el tiempo exacto del proceso de descarga de Wilcom EmbroideryStudio 12.0.0075 para Windows/Mac. Descargue Wilcom EmbroideryStudio 12.0.0075.Q: C# Mocking ServiceStack OrmLite.net core I have been trying to mock the OrmLite Repository and ServiceStack Repository for a while and everything works fine but when I try to unit test in c# even with the verifiable attribute set to true it still fails. Since it works in the Services I think there are something special with this OrmLiteRepository but I can't figure it out. The error is at the On Execute() method call (s.Execute().Result) and it says: InvalidOperationException: The type or

function named 'OnExecute' has not been declared. I have searched for hours and I only can find examples of doing it with a mocked repository so I don't see what I have done wrong.

```
ServiceStack.OrmLite.V4.OrmLiteRepository
factory =
OrmLiteRepositoryFactory.Instance;
factory.ContextProvider = new
TestServiceContext(factory); using (var db =
factory.OpenDbConnection()) { var s = new
TestService { Db = c6a93da74d
