You can answer with more links or some of the list: A: As I understand it, it is due to a DOS batch file loading the wrong encoding. For instance, the file zenith.bat is included

with a UTF-8 file in the
game's installation
and contains this line:
@REM set DUMP_FOLDER=
D:\games\2012\saxofon-jimmy\dump

Whereas I have found
the correct DOS
encoding to be ISO
8859-1, possibly
confusingly also

encoded in UTF-8. I have removed the DOS encoding and retested the game, and it works as expected now. Diesel locomotives in the United States From the beginning of the 20th century until the end of the 1950s, almost

all steam locomotives
in the United States
were built to the
American Type 1
wheel arrangement of
4-6-2 and 2-6-2 wheel
arrangement. The last
steam locomotives
built in the US were a
class of 25 small
Southern Pacific

engines with a 2-6-6 wheel arrangement.

The last operating steam engines in the US were retired in the late 1960s. The Great Western Railway of England operated a number of 2-6-4 and 2-6-2T engines in the US. In the 1910s and

20s, the Central
Railroad of New Jersey
operated 38 Baldwin
2-8-2 class and
American 2-8-2 and
2-10-2 engines on the
Central Main Line of
New Jersey. In the
1920s, the
Pennsylvania Railroad
operated 2-8-2 and

2-10-2 class engines on the mainline from New York to Altoona. In 1939, the Central Pacific Railroad obtained 44 ex-Chicago and North Western 2-8-2 class engines from Chicago and North Western and eleven more in

1944 from
Shinkansen. In 1966,
the Chicago and North
Western rebuilt the
former Chicago and
North Western 2-8-2
class into the 2-8-2
and 2-10-2 class
engines. The CB&Q
operated Baldwin
2-8-2 and American

2-8-2 and 2-10-2 class engines from 1882 to c6a93da74d
